

BODY INTERACT™

bodyinteract.com

Virtual Patients Simulator for High School and CTE

Empowering Students for Success in Health Professions

let's go!

Body Interact represents an effective simulation approach to actively engaging students in- and outside the classroom. Modernize traditional Health Science education to better prepare students and meet industry needs.

- ▶ Increase students' engagement and active learning
- ▶ Foster critical thinking and teamwork
- ▶ Provide critical feedback based on performance assessment

Consolidate classroom knowledge by exposing students to life-like patient scenarios in a safe, controlled and dynamic environment.

A comprehensive catalog with a wide range of scenarios

Our catalog is designed to align with the National Health Science Standards set by NCHSE.

Scenarios are categorized based on their level of complexity, ranging from basic to intermediate and advanced.

Covered Topics

- ▶ Cardiovascular
- ▶ Digestive
- ▶ Endocrine
- ▶ Integumentary
- ▶ Lymphatic / Immune / Infectious disease
- ▶ Mental health
- ▶ Musculoskeletal
- ▶ Nervous
- ▶ Reproductive / Pregnancy
- ▶ Respiratory
- ▶ Urinary

Apart from the body systems curriculum, Body Interact supports specific modules for: **CPR, EMT, First Aid, Sports Medicine**

Contact our team to find the ideal licensing plan according to your budget and program requirements.
